

Desktop-Profile-build
/_deps/googletest-src
/googletest/samples/sample2
_unittest.cc

```
graph TD; A["Desktop-Profile-build  
/_deps/googletest-src  
/googletest/samples/sample2  
_unittest.cc"] --> B["sample2.h"]; A --> C["gtest/gtest.h"]; B --> D["string.h"];
```

The diagram illustrates the file dependencies for the source file `_unittest.cc`. It is a directed graph where nodes represent files and arrows represent dependencies. The top node, `_unittest.cc`, is a dark gray box. It has two outgoing arrows: one to `sample2.h` (a white box) and one to `gtest/gtest.h` (a light gray box). The `sample2.h` node has one outgoing arrow to `string.h` (a light gray box).

sample2.h

gtest/gtest.h

string.h
