

Desktop-Release-build
/_deps/googletest-src
/googletest/samples/sample2
_unittest.cc

```
graph TD; A["Desktop-Release-build  
/_deps/googletest-src  
/googletest/samples/sample2  
_unittest.cc"] --> B["sample2.h"]; A --> C["gtest/gtest.h"]; B --> D["string.h"];
```

The diagram illustrates the file dependencies for the source file `_unittest.cc`. It is a directed graph where nodes represent files and arrows represent dependencies. The root node is a dark gray box containing the full path to `_unittest.cc`. Two arrows point from this root to `sample2.h` and `gtest/gtest.h`. A third arrow points from `sample2.h` to `string.h`. The boxes for `sample2.h` and `string.h` are white, while the others are gray.

sample2.h

gtest/gtest.h

string.h
