

cmake-build/_deps/googletest
-src/googlemock/include/gmock
/gmock-more-matchers.h

```
graph TD; A["cmake-build/_deps/googletest<br/>-src/googlemock/include/gmock<br/>/gmock-more-matchers.h"] --> B["ostream"]; A --> C["string"]; A --> D["gmock/gmock-matchers.h"];
```

The diagram illustrates the decomposition of a file path into its constituent parts. A top box contains the full path: 'cmake-build/_deps/googletest-src/googlemock/include/gmock/gmock-more-matchers.h'. Three blue arrows point from this box to three separate bottom boxes: 'ostream', 'string', and 'gmock/gmock-matchers.h'. These bottom boxes represent the individual components of the path, likely for a search or indexing process.

ostream

string
