

cmake-build/_deps/googletest
-src/googletest/samples/sample3-inl.h

```
graph BT; A["cmake-build/_deps/googletest  
-src/googletest/samples/sample3-inl.h"] <-- B["cmake-build/_deps/googletest  
-src/googletest/samples/sample3  
_unittest.cc"]; A <-- C["cmake-build/_deps/googletest  
-src/googletest/samples/sample5  
_unittest.cc"];
```

The diagram illustrates a dependency relationship. At the top, a gray box contains the header file path: `cmake-build/_deps/googletest-src/googletest/samples/sample3-inl.h`. Below it, two white boxes represent source files. The left box contains `cmake-build/_deps/googletest-src/googletest/samples/sample3_unittest.cc` and the right box contains `cmake-build/_deps/googletest-src/googletest/samples/sample5_unittest.cc`. Blue arrows point from each source file box up to the header file box, indicating that both source files include this header.

cmake-build/_deps/googletest
-src/googletest/samples/sample3
_unittest.cc

cmake-build/_deps/googletest
-src/googletest/samples/sample5
_unittest.cc
